MEMORANUDM FOR THE RECORD

SUBJECT: BX6724 Automated Flight Plan

1. During BX6724 an unusual amount of time was utilized before receipt of the flight plan with options.
2. The problems that created this time consumption are as listed:
 - A. Computer Machine
 - (1) Software - disks etc.
 - (2) Hardware - 360/7090 Emulation
 - B. Operator - OSA and OCS
 - C. Flight Planners
3. Each of these factors contributed to the late transmission of both the primary route and option route.
4. Steps are being taken to alleviate the recurrence of delays on future missions. The necessary coordination/requirements have been accomplished.
